↘SEARCH AND DESTROY↙

COPYRIGHT 1983 L & M SOFTWARE

Dr. Oppenheimer, a nuclear physicist in our research and development lab, has suffered a mental breakdown. He has gotten control of our experimental nuclear sub, "Dolphin", which has the capability to destroy the world. Your mission is to man the battleship "Falcon" and search sectors 1 thru 60. Unfortunately, for the safety of the world, you must destroy the "Dolphin" using depth charges. Be careful, we have information that Dr. Oppenheimer has mined the area and also has full use of powerful lasers capable of destroying the "Falcon". Using the keyboard, enter the sector number which you wish to depth charge (NOTE: Put zero (0) first when entering nos. 1-9), then press "go" to fire. You cannot enter a sector which has been eliminated by either laser beam or depth charge. FOR REPLAY PRESS ANY KEY !!!!!

No need to press go now

Fred: I have recorded this revised game onto your cassette. So you now have an improved version at your disposal. This version uses the keyboard in a smooth way. Try it!
